SUMMARY

Senior Cloud Platform / DevOps Engineer with 9+ years designing, modernizing, and optimizing scalable cloud infrastructure across food-tech, healthcare, retail, financial IR, and data platforms. Specializes in Infrastructure as Code, Kubernetes, CI/CD automation, and FinOps. Delivers with high autonomy and full ownership — from multi-account / multi-region Terraform architecture to least-privilege deployment models and developer-platform standardization.

EXPERIENCE

Cloud Platform Engineer

2026 – Present · Remote

Q4 Inc. (Canada) — Investor-relations platform

Led multi-account / multi-region refactor; decomposed a Terraform monolith into reusable modules; region-first Terragrunt architecture reducing blast radius; automated CI/CD validation and approval workflows; provider caching + parallel matrix execution; least-privilege deployment models; FinOps CI resource optimization.

Senior DevOps Engineer (Consultant)

Sep 2024 – 2026 · Remote

Modus Create — client: HealthEdge (USA)

Consolidated a fragmented development platform: migrated 4,000+ repos and 1,000+ CI/CD pipelines to GitHub Enterprise Cloud; AAD integration for IAM; standardized GitHub Actions workflows; GHAS adoption; reduced operational complexity; operated with high autonomy.

Senior DevOps Engineer (Consultant)

Nov 2023 – Sep 2024 · Remote

Islands — client: Ghost Kitchen Brands (Canada)

Led full cloud reengineering during rapid growth and a cost crisis: 61% AWS cost reduction (\$9k → \$3.5k/month); 88% deployment-time reduction (14 min → 1 min 40 sec); FinOps framework (cost allocation, tagging, showback); dedicated dev environment eliminating direct prod deploys. Sole DevOps engineer with full ownership.

Senior DevOps Engineer (Consultant)

Jan 2023 – Nov 2023 · Remote

Veloziert — client: HungerRush (USA)

Modernized legacy Windows Server systems to Kubernetes; deployed Octopus Deploy on K8s for .NET workloads; Terraform IaC; containerization and cloud-native practices.

Senior DevOps Engineer (Consultant)

Jul 2021 – Jan 2023 · Remote

BairesDev — client: Omatic (USA)

Kubernetes adoption at scale (~300 containerized services); Terraform; CI/CD for containers; autoscaling; Prometheus + Grafana observability; Kafka (Strimzi) and batch processing.

DevOps Engineer / Digital Architecture Consultant

2020 – 2021 · Brazil

CI&T — clients: Uber, Rappi (Brazil)

Uber: Azure infrastructure + K8s microservices + Cosmos DB + Azure DevOps; payment-system reliability. Rappi: AWS CodePipeline + CloudFormation; MVP delivery acceleration.

MLOps / DataOps Engineer

2021 · Brazil

NTT DATA — client: Grupo Pão de Açúcar (Brazil)

STIX Loyalty Platform: Data Lake + DWH + ETL on Azure (Data Factory, Synapse, Terraform, Azure DevOps).

Big Data Engineer

2021 · Germany

SVA — client: Daimler (Germany)

Kafka (Strimzi) on Kubernetes; HA streaming configuration; cloud-native data infrastructure.

DevOps & Software Engineer

2017 – 2019 · Brazil

Early Career

CI/CD for microservices; IaC; containerization; monolith-to-distributed migration; backend services and APIs.

TECHNICAL SKILLS

Infrastructure as Code: Terraform, Terragrunt, CloudFormation, ARM Templates

CI/CD & Dev Platforms: GitHub Actions, GitLab CI/CD, Jenkins, Azure DevOps, AWS CodePipeline, Octopus Deploy

Data & Streaming: Kafka (Strimzi), Databricks, Azure Data Factory, Azure Synapse, Cosmos DB

Programming: Python, Go, JavaScript/TypeScript, Bash, PowerShell

Containers & Orchestration: Kubernetes (EKS, AKS), Docker, Karpenter

Observability & Reliability: Prometheus, Grafana, ELK Stack, Datadog, AWS CloudWatch

Security & Governance: GHAS, IAM, Secrets Management, Policy-as-Code

Cloud: AWS (primary), Azure, GCP

EDUCATION

B.Eng – Mechatronics, Robotics and Automation

University of Campinas (UNICAMP), Brazil · Undergraduate

Postgraduate – Complex Data Mining

University of Campinas (UNICAMP), Brazil · Postgraduate

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate · Linux Academy
- Managing Microsoft Azure Applications and Infrastructure with Terraform · Linux Academy
- Data Science & Machine Learning · Escola Tech WAT
- Ansible: Infrastructure as Code · Alura (2019)
- Terraform: Automate Your Cloud Infrastructure · Alura (2019)
- Kubernetes: Container Orchestration Introduction · Alura (2019)
- Vagrant: Virtual Machines Management · Alura (2019)
- FCE (First Certificate in English) · University of Cambridge (2007)
